

Magnetic particle testing

Measuring device for:

- DC-impulse current
- DC-impulse field strength
- Residual field strength

Measuring device MULTIPULS-1001

For precise measurement of electrical values during MT-testing and demagnetization with a mobile MT-testing unit MULTIPULS-1003 using DC-impulse current

High speed induction free measurement of:

- DC-impulse current
- DC-impulse field strength
- Residual field strength
- No calibration necessary
- Interface for an oscilloscope or plotter
